Subject: STOP THE MADNESS PROPOSED AT YUCCA MOUNTAIN!!!

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

Dear People:

1 [Please think about the madness of moving so many tons of spent nuclear waste - more dangerous than any of us truly know - across our beautiful nation. Please think about this as people - as sons, daughters, parents, and grandparents. You know accidents are bound to happen. You know moving this material around is inviting to terrorist attacks. You know you are willingly risking exposing your own relatives to nuclear radiation. I've heard an accident can poison an area in a 200 mile radius - killing people, animals, crops, forests. Are you really callous enough to risk this? For what?

Yucca Mountain itself is NOT geologically stable. It is on a mountain known to be moving, riddled with unstable faults. It straddles a major water table in a huge arid area that would be lifeless were the water contaminated. You know this is very likely. You know no human technology will stand up to 10,000 or so years of aging. If you think about this a people who care about the health of this nation, of this Earth, you cannot proceed with the madness of storing nuclear waste here.

Just think about this. }

2 And if just thinking about it isn't enough, study the magnitude of highly intelligent, soundly presented reasons at such websites as www.h-o-m-e.org/Yucca/index.htm . [Apparently the US doesn't even own this land! How in the world is the Dept. of Energy entitled to pollute it? Didn't the recent UN CERD decision protect against just such infractions?]

Please stop!

Please! It is you PEOPLE who will enact this madness - or stop it.

The world will be watching us. Isn't it time we start acting responsibly? It begins with YOU.

Thank you for remembering who you are, and who you endanger and protect with your actions.

God bless you!
